## Management Science Group Abstracts, 1971-72 (Classic Reprint)

By Sloan School of Management Manag Group

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Management Science Group Abstracts, 1971-72 This paper describes a strategic planning model designed to be used by managers of family planning systems to improve understanding, forecasting, and planning. The macro-flow model describes the patient movement through post partum and non-post partum programs. The flows model the phenomena of: outreach, continuance, post partum check ups, switching methods, referral, migration, contraceptive use experience, private protection, method effectiveness, follow up, and abortion. Strategic variables can be linked to the flow parameters to produce capacity requirements and budgetary implications. The model output includes benefit measures of total actives, couple years of protection, Births protected, and unwanted births prevented. The fertility aspects of births prevented are modeled through a non-stationary Markov process submodel which considers demographic phenomena without burdening the basic flow structure. The input procedures used to process service statistics, outreach, clinic survey, and experimental data are are discussed. The combination of data based estimates and subjective judgment is done by fitting the model to past observed data. Testing is done by tracking model performance through conditional prediction, diagnosis,...
