Excerpt from *Yellow Fever Commission, West Africa: Second Report* The disease, which is the subject of the following sheets, does not happen annually at Senegal, but only in those years when the rains are extraordinarily frequent, heavy and of a long continuance. The common diseases of the country during moderate rainy seasons are intermitting and remitting bilious fevers and ?uxes. The first of these generally yield to antimonials and bark and are not very fatal; but the latter are very stubborn and if they are not overcome in the beginning they generally carry off the patients.
