

The Magnetic Levitation Train: A Technology ahead of Its Time

Filesize: 7.79 MB

Reviews

It is straightforward in go through easier to recognize. I actually have study and that i am sure that i will going to study yet again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

GRIN Verlag. Paperback. Condition: New. This item is printed on demand. 24 pages. Seminar paper from the year 2008 in the subject Industrial Engineering and Management, grade: 1, 3, Vrije University Brussel (Solvay Business School), course: Advanced Technology, language: English, abstract: The magnetic levitation train analysed in this study was developed in Germany by the Transrapid International GmbH and Co. KG, a joint venture by Siemens AG and ThyssenKrupp AG, as a means for high speed transportation. First prototypes were presented to the public as early as 1969 and 1979, yet, the first public high-speed maglev track was opened only four years ago in Shanghai, China. Despite the fact that businesspeople like engineers from all sorts of backgrounds speak very highly of the technology, the Shanghai track remains the only commercially operated one thus far. 1 Purpose of this paper is to analyse the potential of the maglev train, to assess its strengths and weaknesses, and to spot opportunities as well as threats to the application of this state-of-the-art - or perhaps ahead-of-its-time - technology. This item ships from La Vergne, TN. Paperback.
