A THEORY OF LIFE DEDUCED FROM THE EVOLUTION PHILOSOPHY (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Theory of Life Deduced From the Evolution Philosophy Beneath the abstractions and generalizations of every system of philosophy, worthy of the name, there lies concealed what may be a theory or interpretation of life, using the word life in its deepest and widest possible signification. True of philosophical systems in general, this is preeminently so of the Evolution Philosophy. Nay, more: assuming the real worth of any system of philosophy to be properly determinable by the rationality, the logical consistency, and the practical value of its theory of life, we can hardly question the superiority of the Evolution Philosophy over the metaphysical systems which it is destined to supplant. It is no part of our present purpose to advance arguments in support of these propositions except in so far as the exposition presently to be laid before the reader may be considered in this light. No one at all familiar with the subject will need to be told that the central doctrines of the Evolution Philosophy, as herein set forth, are, to all intents and purposes, identical with the cardinal teachings of Herbert Spencer s Synthetic Philosophy.
