Reviews

It is one of the most popular pdfs. It really is full of knowledge and wisdom. It has been developed in an exceptionally easy way and it is just right after I finished reading through this publication by which it really altered me, altered the way in my opinion.

Createspace Independent Publishing Platform, 2013. Paperback. Condition: New. Illustrated. Language: English . Brand New Book ***** Print on Demand *****. NEW 2017 edition. What determines colours? What is motion? All colours in nature derive from the fine structure constant $1/137.0359991$, the most famous unexplained number in nature. What determines its value? All motion in nature is described either by quantum theory or by Einstein's general relativity, two theories that contradict each other. How can they be unified in a final theory? If you enjoy exploring ideas and checking them against the real world, you will like this volume. It first explains why the past proposals for a final, unified theory of physics - the so-called theory of everything - have failed. Then, the text presents a better proposal: a final theory called the strand model. This model agrees with all experimental data known so far and makes clear, falsifiable predictions. They are being tested in experiments around the world. The strand model - predicts the standard model of particle physics - and allows no alternative or extension, - is based on one simple fundamental principle - and thus is beautiful, - predicts general relativity - and allows no alternative or extension, - predicts quantum theory - and allows no alternative or extension, - and solves the open issues of the standard model, gravitation and cosmology, including the explanation of all fundamental constants. These results follow naturally from one simple principle. Prepare yourself for a roller coaster ride through modern physics, and for the excitement of solving one of the oldest physics puzzles known. This is an adventure that leads beyond space and time - right to the limits of human thought. For example, the adventure shows that the term theory of everything is wrong, whereas final...
