Multiplying a dividend by a number has the same effect upon the quotient as dividing the divisor by that number. Also, to bring down a figure is equivalent to multiplying the remainder by 10 and adding that number, and to cut off a figure from the divisor is equivalent to subtracting that number and dividing by 10. Then, evidently one may cut off a figure from the divisor instead of bringing down one from the dividend, without having much effect upon the quotient. (What is the difference?) In the work above, 16 was cut off before beginning the division, for it was at once evident that only three figures were required in the answer. The 4 of the divisor was cut off before the second division, then the 1 to its left before the third division. EXERCISES.
