

## Molecular Consciousness: Why the Universe Is Aware of Our Presence

By Françoise Tibika

Inner Traditions Bear and Company. Paperback. Book Condition: new. BRAND NEW, Molecular Consciousness: Why the Universe Is Aware of Our Presence, Françoise Tibika, \*Explains how your state of mind is profoundly related to the flow of chemical information during the interactions of your molecules\* Reveals how each atom of the universe is intrinsically linked with all other atoms through their memories and the information they carry\* Explores the concrete manifestations of this molecular consciousness, such as intuition and the appearance of life on earth The molecules of living organisms are in constant communication, storing and transmitting information both at the intracellular level as well as across vast distances. The mystery of how this communication occurs whether through molecular structure, chemical reactions, entangled states or some other method has baffled biologists, chemists and quantum physicists for more than a century. Revealing the intimate connections between mind and matter, Françoise Tibika explains that conscious communication exists all the way down to the very molecules of which we and the universe are made. Using the fundamental laws of thermodynamics to support her argument especially the first law: energy is neither created nor destroyed as well as modern scientific research in quantum physics and molecular biology, Tibika explores how each imperishable atom of...

### Reviews

*Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.*

-- Felicia Nikolaus

*These sorts of ebook is the ideal book offered. It can be written in simple terms rather than confusing. I discovered this pdf from my dad and i advised this publication to understand.*

-- Mr. Alejandrin Murphy PhD
