

## Impact of Chinese Naval Modernization on the Future of the United States Navy (Paperback)

By Ronald O'Rourke

Nova Science Publishers Inc, United States, 2006. Paperback. Condition: New. UK ed.. Language: English . Brand New Book. China's rapidly developing military capabilities have forced US policy makers to reconsider their own military infrastructure. The primary concern of this book is to examine how China's military modernisation will be factored into decisions about US Navy programs. Several elements of China's military modernisation have potential implications for future required US Navy capabilities. These include theatre-range ballistic missiles (TBMs), land-attack cruise missiles (LACMs), anti-ship cruise missiles (ASCMs), surface-to-air missiles (SAMS), land-based aircraft, submarines, surface combatants, amphibious ships, naval mines, nuclear weapons, and possibly high-power microwave (HPM) devices. This book will examine how these elements and others will influence the future of the United States Navy.
