

A Brighter Tomorrow: Fulfilling the Promise of Nuclear Energy

By Domenici, Pete V.; Lyons, Blythe J.; Steyn, Julian J.

Rowman & Littlefield Publishers, 2006. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: The book takes a proactive and, at times, provocative look at nuclear power and argues that it is the source of energy for the future of the United States. Senator Pete V. Domenici (R-New Mexico) will argue that after weighing the costs and benefits of all other legitimate forms of energy production (coal, oil, wind, hydro) nuclear power will not only reduce American dependence on the Middle East oil but it is the most "green" source. Domenici is the primary author and sponsor of the energy bill weaving its way through the Senate - the nuclear energy portion of the bill will, among other things, assist in the financing of the construction of three new nuclear power plants (the first in 30 years). Sprinkled throughout this otherwise serious book will be 30 years worth of anecdotes and insights into the personalities behind the political process and policymaking.
