

**IUTAM Symposium on the Vibration Analysis of Structures with Uncertainties:
Proceedings of the IUTAM Symposium on the Vibration Analysis of Structures
with Uncertainties held in St. Petersburg, Russia, July 5-9, 2009 (Paperback)**

Filesize: 4.34 MB

Reviews

The publication is easy in read through preferable to fully grasp. It is writter in simple phrases instead of hard to understand. You will not sense monotony at at any moment of your respective time (that's what catalogs are for concerning if you request me).

(Kevin Bergstrom Sr.)

**IUTAM SYMPOSIUM ON THE VIBRATION ANALYSIS OF STRUCTURES WITH UNCERTAINTIES:
PROCEEDINGS OF THE IUTAM SYMPOSIUM ON THE VIBRATION ANALYSIS OF STRUCTURES WITH
UNCERTAINTIES HELD IN ST. PETERSBURG, RUSSIA, JULY 5-9, 2009 (PAPERBACK)**

To get **IUTAM Symposium on the Vibration Analysis of Structures with Uncertainties: Proceedings of the IUTAM Symposium on the Vibration Analysis of Structures with Uncertainties held in St. Petersburg, Russia, July 5-9, 2009 (Paperback)** eBook, remember to access the button beneath and download the ebook or have access to other information which are related to IUTAM SYMPOSIUM ON THE VIBRATION ANALYSIS OF STRUCTURES WITH UNCERTAINTIES: PROCEEDINGS OF THE IUTAM SYMPOSIUM ON THE VIBRATION ANALYSIS OF STRUCTURES WITH UNCERTAINTIES HELD IN ST. PETERSBURG, RUSSIA, JULY 5-9, 2009 (PAPERBACK) book.

Springer, Netherlands, 2013. Paperback. Condition: New. 2011 ed.. Language: English . Brand New Book ***** Print on Demand *****. The Symposium was aimed at the theoretical and numerical problems involved in modelling the dynamic response of structures which have uncertain properties due to variability in the manufacturing and assembly process, with automotive and aerospace structures forming prime examples. It is wellknown that the difficulty in predicting the response statistics of such structures is immense, due to the complexity of the structure, the large number of variables which might be uncertain, and the inevitable lack of data regarding the statistical distribution of these variables. The Symposium participants presented the latest thinking in this very active research area, and novel techniques were presented covering the full frequency spectrum of low, mid, and high frequency vibration problems. It was demonstrated that for high frequency vibrations the response statistics can saturate and become independent of the detailed distribution of the uncertain system parameters. A number of presentations exploited this physical behaviour by using and extending methods originally developed in both phenomenological thermodynamics and in the fields of quantum mechanics and random matrix theory. For low frequency vibrations a number of presentations focussed on parametric uncertainty modelling (for example, probabilistic models, interval analysis, and fuzzy descriptions) and on methods of propagating this uncertainty through a large dynamic model in an efficient way. At mid frequencies the problem is mixed, and various hybrid schemes were proposed. It is clear that a comprehensive solution to the problem of predicting the vibration response of uncertain structures across the whole frequency range requires expertise across a wide range of areas (including probabilistic and non-probabilistic methods, interval and info-gap analysis, statistical energy analysis, statistical thermodynamics, random wave approaches, and large scale computations) and this IUTAM symposium presented a unique opportunity to bring together outstanding...
