Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from On Boiler Incrustation and Corrosion There is perhaps no subject connected with Engineering Science Which at the present time commands more attention or causes more perplexity than does the compound subject of this paper. In Marine Engine practice its difficulties are most keenly felt; and of itself that is a field of operation large enough, as it involves interests sufficiently extensive, to give great importance to the subject, and to demand the utmost exertions of engineers towards the solution of its problems, and the providing of remedies or preventive measures against the ravages of What is an active and powerful agent in the destruction of their works. But the range of action Which this destructive agent has is bounded only by that Which puts a limit to the use of steam, and hence many other interests besides those of engineers are involved in the matter.
