

Cerebral Palsy in children of Ohangwena region (Namibia): A case control study of risk factors

By Marine Stephen Kimaro

GRIN Verlag Jul 2011, 2011. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Neuware - Projektarbeit aus dem Jahr 2011 im Fachbereich Medizin - Pädiatrie, Kinderheilkunde, - (Atlantic International University Honolulu), Sprache: Deutsch, Abstract: Cerebral palsy is a major cause of disability in children. It's etiology poorly understood. 20%-50% of the cause of CP is unknown. This study was done to identify some of the risk factors. 62 cerebral palsied children were subject matter of the study, and 62 children match age and sex as control. Info was obtained through qualitative mode of research- investigative/explorative questioning of mothers and/or guardian of the subject children. Findings were multifactorial; study revealed antenatal (gestational) risk factors mainly associated with developed countries, were equally evident in research study area (Ohangwena-NAMIBIA) which is a developing country. Case in point, maternal high blood pressure. Other factors typical of developing country were the likes of poor maternal nutrition (low protein intake during pregnancy) and low educational level of mothers. The study also found out a long held concept that; home deliveries areas major cause of CP was not a case, incidence of CP was at par between institutional and home deliveries. Absence of a steady decline in the percentage (%) of...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to look ahead of time and a lot more. I am quite late in start reading this one, but better than never. I found out this book from my dad and he encouraged this pdf to find out.
