*A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).*

Oxford University Press, United Kingdom, 2001. Paperback. Condition: New. Revised ed.. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. The series: General Editors: John Harris, University of Manchester; Soren Holm, University of Manchester. Consulting Editor: Ranaan Gillon, Director, Imperial College Health Service, London. North American Consulting Editor: Bonnie Steinbock, Professor of Philosophy, SUNY, Albany. The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care, and these developments have brought with them important social changes. All too often ethical analysis has lagged behind these changes. The purpose of this series is to provide lively, up-to-date, and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics-not just health care trainees and professionals, but also social scientists, philosophers, lawyers, social workers, and legislators. The series will feature both single-author and multi-author books, short and accessible enough to be widely read, each of them focused on an issue of outstanding current importance and interest. Philosophers, doctors, and lawyers from several countries already feature among the contributors to the series. It promises to become the leading channel for the best original work in this burgeoning field. This book: Testing and screening for HIV and AIDS give rise to ethical, legal, and social issues of the most controversial and delicate kind. An international team of eighteen doctors, philosophers, and lawyers present a fresh and thorough discussion of these issues; they aim to show the way to practical advances but also to give an accessible guide to the debates for readers new to them. The contributors pay particular attention to the sensitive nature of the information yielded by a test for HIV antibody. They consider such questions as these: Are we under an obligation to disclose our HIV status if...
