

Risk Management Series: Safe Rooms and Shelters - Protecting People Against Terrorist Attacks (Fema 453 May 2006)

Filesize: 3.44 MB

Reviews

Excellent e-book and useful one. It can be rally intriguing throug looking at time period. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Pasquale Klocko)

RISK MANAGEMENT SERIES: SAFE ROOMS AND SHELTERS - PROTECTING PEOPLE AGAINST TERRORIST ATTACKS (FEMA 453 MAY 2006)

Createspace. Paperback. Condition: New. This item is printed on demand. 262 pages. Dimensions: 11.0in. x 8.5in. x 0.6in. This manual is intended to provide guidance for engineers, architects, building officials, and property owners to design shelters and safe rooms in buildings. It presents information about the design and construction of shelters in the work place, home, or community building that will provide protection in response to manmade hazards. The information contained herein will assist in the planning and design of shelters that may be constructed outside or within dwellings or public buildings. These safe rooms will protect occupants from a variety of hazards, including debris impact, accidental or intentional explosive detonation, and the accidental or intentional release of a toxic substance into the air. Safe rooms may also be designed to protect individuals from assaults and attempted kidnapping, which requires design features to resist forced entry and ballistic impact. This covers a range of protective options, from low-cost expedient protection (what is commonly referred to as sheltering-in-place) to safe rooms ventilated and pressurized with air purified by ultra-high-efficiency filters. These safe rooms protect against toxic gases, vapors, and aerosols. The contents of this manual supplement the information provided in FEMA 361, Design and Construction Guidance for Community Shelters and FEMA 320, Taking Shelter From the Storm: Building a Safe Room Inside Your House. In conjunction with FEMA 361 and FEMA 320, this publication can be used for the protection of shelters against natural disasters. This guidance focuses on safe rooms as standby systems, ones that do not provide protection on a continuous basis. To employ a standby system requires warning based on knowledge that a hazardous condition exists or is imminent. Protection is initiated as a result of warnings from civil authorities about a release of hazardous materials, visible or audible...
