Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Preface to the History of Nations We have also passed definitely and finally out of the stage where history was considered too solemn and too dignified to have any of the attractions of what is frankly gossip, and yet remained nothing but a stringing together of facts, as if they were single beads, each separated from the others by a dividing and impassable knot. The habit is now ingrained in all writers of history, even if they are merely dealing with an episode or preparing a monograph, to lead up from cause to effect, to point out the sources of an event, the culmination of the various compelling forces and the ultimate results, or else to arrange the narrative in such wise that the reader must perform draw his own deductions and thus learn the lesson which the author desires to impart, This method of dealing with history varies, of course, most widely in the extent of its application. It may be applied to a single incident or to the occurrences of a few years; or, on the other hand, it may stretch over the centuries, seeking in past generations the distant conditions from which sprang finally some great event; or, again, it may strive to connect with the phenomena of our modern times remote causes which are dimly discerned in the dawn of civilization, and in this way establish a law which shall govern the entire movement of humanity.
