

Groundwater resource evaluation and protection

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Groundwater resource evaluation and protection in the Cape Flats, South Africa | The Cape Flats, characterized by relatively flat surface and vegetation of thick Coastal Fynbos, represent the Late-Tertiary and Recent sands' unit up to 50 m thick in places. The sandy aquifer is underlain by Precambrian and Palaeozoic rocks belonging to the Cape granite suite, the Malmesbury Formation, and the Table Mountain Group. With a long- term mean annual precipitation (MAP) of 600 mm, the management of the groundwater resource in this area becomes necessary. This book reviews the history and problems of groundwater development, and provides extensive information on the geology, hydrology, hydrogeology, recharge quantification, and groundwater chemistry in the Cape Flats. The aim is to utilize all of the information to aid conceptual understanding as well as develop a method suitable for the aquifer's vulnerability assessment and mapping to set the stage for groundwater protection. The analysis and interpretation of available data provided improved understanding and the characteristics of the Cape Flats aquifer showed the quality of its groundwater is suitable for development as a water resource. | Format: Paperback | Language/Sprache: english | 296 pp.
