Springer. Hardcover. Book Condition: New. Hardcover. 234 pages. Dimensions: 9.5in. x 6.3in. x 0.7in.The development of materials for any replacement or regeneration application should be based on the thorough understanding of the structure to be substituted. This is true in many fields, but particularly exigent in substitution and regeneration medicine. The demands upon the material properties largely depend on the site of application and the function it has to restore. Ideally, a replacement material should mimic the living tissue from...
