*Merely no terms to spell out. We have read through and i also am confident that i will gonna read yet again again in the future. You will not sense monotony at anytime of your own time (that's what catalogs are for about should you question me).

Brand New Book ***** Print on Demand *****.Excerpt from **A Topical Analysis of Advanced American History With Library References for Teachers and Students** Fundamentally history is the connected growth of ideas and institutions. A comprehensive study of history includes more than the mere description of a peoples achievements or progress; it also includes a study of the conditions that made possible certain achievements, and the means used to attain certain results. The study of history is not to learn facts simply as facts, but to understand the causes and results of the great movements in the life of a people. Such a study of history cannot be made by the use of one brief text-book; outside reading is necessary. A nations history cannot be told in a few hundred pages, hence the text-book must be supplemented by the use of reference books. The number need not be large; a few well selected volumes will answer. The Topical Analysis is meant to both assist in gaining a comprehensive understanding of history, and to direct the reading outside the text-book used by the class. A trial of this plan of the study of history will soon convince any teacher and class of its merits over the one book method. The use of a well selected library adds interest to the work, both in the preparation of the lesson and in the recitation.
