# JETS FROM STARS AND GALACTIC NUCLEI

Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of a Workshop Held at Bad Honnef, Germany, 3-7 July 1995 | Jets are ubiquitous in the Universe, but ill-understood. Conservative books base their interpretations on focused stellar winds, ejected "bullets", black-hole central engines, and in-situ upgrading of electron energies via shocks. This volume, however, attempts a uniform interpretation of the bipolar-flow family, involving extremely relativistic pair plasma as the jet substance, and rotating magnets (possibly burning disks) as the central engines....

## Reviews

*It is an incredible ebook which i actually have at any time read through. Better then never, though i am quite late in start reading this one. Once you begin to read the book, it is extremely difficult to leave it before concluding.*
