

Genotoxicological Evaluation of Some Heavy Metals in Fish : Genotoxicity Assay in Fish

By Dr Kamlesh K Yadav

LAP Lambert Acad. Publ. Jul 2011, 2011. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - Life without water can not exist and pollution of this vital fluid by heavy metals affects life precisely. They cause heavy mortality when present in lethal concentrations, however, when present in sub-lethal concentrations they exert undesirable alterations in genetic content of a living cell. Aquatic animals can be used as sentinel species for the evaluation of genotoxic potential of chemicals in the environment and their risk to human health. Fishes play a major role in the flow of energy in aquatic ecosystems and constitute an important part of the human diet. They can be used as a very sensitive indicator for the monitoring of environmental mutagens and carcinogens. Present study finds its relevance in the above context by revealing the fact that heavy metal pollutant, viz. Cr, Hg, As and Cu by virtue of their presence in aquatic habitats not only adversely alter physico-chemical profile of water but also damage genetic profile of the fish model, *C. punctatus*. Thus, posing a threat for the loss of fish diversity, a potent food resource in present circumstances as well as...

Reviews

I just began looking over this pdf. It is one of the most amazing pdf i have study. I discovered this book from my dad and i recommended this pdf to understand.

-- Merritt Kilback II

Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.
