CREA-VOLUTION PROOF THAT AN EVOLUTIONARY BIOLOGIST WROTE THE BOOK OF GENESIS

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 160 pages. Dimensions: 8.5in. x 5.5in. x 0.4in. I would never have thought that the Bible carries hidden messages of evolutionary meaning. There's lots of people who see all kinds of codes in the Bible, most of them seem to be found by applying some mathematical operations to the text. But this book is different. It offers some deep and quite scientific speculations about a hidden level of interpretation that blew my mind. It changed my whole perspective on who might have written this book and why. An Evolutionary Biologist Deciphers The Hidden Messages in the Book of Genesis that have been laying in plain sight for over 3,000 years! Only now do we have the scientific evidence to understand the stories in the book of Genesis as metaphors for advanced evolutionary, genetic, and biochemical concepts. The tree of eternal life-The evolutionary tree of the first life forms which included non-aging non-predator plants. The tree of knowledge of good and evil-the evolutionary tree of predators and prey which ultimately leads to the evolution of intelligence! Making Eve from a rib of Adam: look at both their skeletons after this event and you have the perfect image of human chromosomes where women have 23 pairs of large chromosomes including an XX, and men have 22 pairs of large chromosomes and one pair Xy where it looks like a chromosome (rib) is missing! Cain and Abel are seen as early single cell organisms where one absorbs the other and becomes his brother's keeper: the modern day human cell with its kept brother- the mitochondria. Once Cain killed Abel-he became a predator instead of a plant. . . . and how do predators find their food-by becoming wanderers and hunters....
