

Research in Medicine: Planning a Project - Writing a Thesis (Paperback)

By Juliet A. Usher-smith, George Murrell, Harold Ellis

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2010. Paperback. Condition: New. 3rd Revised edition. Language: English . Brand New Book. Health professionals are increasingly drawn towards research in the course of their training, often with little guidance on the skills and techniques required. This practical text provides essential advice to guide the beginner through the processes involved in selecting, organizing, funding, undertaking, evaluating and publishing a biomedical research project, and completing a postgraduate qualification. Cartoon illustrations provide a wry commentary on the ups and downs of life in research. This edition contains new content on choosing supervisors, career implications, degree structures, ethical issues and time conflicts between research and service needs, and is fully revised and updated to reflect changes in the structure of medical careers and degree courses, and the use of computational and information technology in research presentation. An invaluable guide suitable for all stages of a medical research career, from the first stages of research, through to professional supervisors, career counselors and postgraduate tutors.

Reviews

Merely no words to spell out. It is amongst the most awesome publication i have read. Your life span will likely be transform as soon as you full reading this book.

-- **Marvin Okuneva**

Completely among the best publication I have got at any time go through. I have got go through and so i am confident that i will likely to read again once more down the road. It is extremely difficult to leave it before concluding, once you begin to read the book.
