Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1828 Excerpt: . upper side. The present plant is one of the most curious hybrid productions of this tribe that we have yet seen, having been raised from seed in the collection of R. H. Jenkinson, Esq. from one of the species of Dimacria, that was fertilized with the pollen of one of the Lemon-scented species of Pelargonium; its leaves are clove-scented, and the curiosity of the plant makes it well deserving a place in all curious collections; it requires the same management as the other tuberous-rooted sorts, thriving best in an equal portion of light turfy loam, peat, and sand, requiring but little water in Winter; but it must not be allowed to die down altogether, like many of the real tuberous-rooted sorts, the present being slightly suffruticose, and if allowed to get all its branches killed down to the root, it will be some time in...
