Coal and labor are abundant and cheap, transportation facilities are excellent, and many of the best limestone and chalk localities are situated on navigable rivers, giving ready access and cheap water transportation to Galveston, New Orleans, Mobile, Charleston, and other ports of the Gulf and Atlantic Coasts. This advantage of location will be immensely increased when work is begun on the Isthmian canal, for cement plants located in Alabama will be more than a thousand miles nearer to the Isthmus than their nearest possible competitors. The limestones and shales of the northern part of the state lie so close to each other and above all, so close to the great coal mines which must supply the fuel, that the establishment of CEMENT RESOURCES: TRENTON LIMESTONE. 43 Portland...
