Approximately 8.7 of the U.S. population suffer from specific phobias. (Source: National Institute of Mental Health.) In the new #1 International Bestseller, Phobia Relief: From Fear to Freedom, author Kalliope Barlis offers step-by-step instructions for getting rid of illogical fears and phobias. Every person in the world is born with two fears: the fear of falling and the fear of loud noises. All the rest - fear of spiders, snakes, clowns, flying, close spaces, getting sick, dogs, needles - are all learned and can be unlearned. By using Neuro-Linguistic Programming techniques, these phobias can be controlled and even eliminated. What Kalliope Barlis offers is education, not therapy, and the results can be absolutely liberating! When there is a strong reaction to anything, the ability to remain calm is possible because anything is possible when one changes how they think. It's just a matter of finding out how to do it, step by step, so that it becomes second nature. A person changing how they think can resolve their fears and feel propelled to do more of what they want to do. By completing the exercises in the new bestseller, a person will be able to: learn the true cause of their phobias; gain control over formerly uncontrollable thoughts; shrink fears and reverse them. With these NLP techniques, a person can stop visualizing what they DON'T want and start visualizing what they DO want. Once this happens, they can...
