# STANDARD METHODS FOR ANALYSIS OF SOIL PLANT AND WATER

Scientific Publishers, 2012. Hardcover. Condition: New. Land, water and plants are of crucial importance to the mankind. While per capita availability of land and water is decreasing due to burgeoning population, degradation is resulting in declining productivity per unit of these resources. This degradation is impacting the environment and the quality of the field crops consumed by the humans and the animals raising serious concerns on the health of the consumers. A concerted effort is being made to keep track...
