Geothermal resources have been identified in over 90 countries in the world, and Accord-ing to the excellent MIT report, A View Toward Geothermal En-ergy, the potential in the United States from enhanced geothermal system is, in fact, a prominent part of the future energy outlook of this country. But the key that is important to realize, the keys to a successful geothermal development are efficient and comprehensive inter-disciplinary geothermal research, and proper resource management during utilization. Let me, therefore, conclude my opening statement by identifying some areas where cooperation with Iceland could benefit the United States in the creation of a major U. S. geothermal program. First, extensive research on geophysical exploration, assessment of low temperature - but also high temperature - and deep and con-ventional geothermal resources, including the so-called hot, dry rock, and supercritical geothermal resources. Second, developing and extending existing drilling technology, for example, by drawing..
