Pantheon, 2012. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: "This is a wonderful memoir. It is personal, occasionally opinionated, at times beautifully written, and with a narrative encompassing a wide range of times, places, and people." -Mark McCartney, London Mathematical Society "Mandelbrot changed the way we look at a wide range of random phenomena from commodity prices to the shapes of mountains, rivers, and coastlines. The memoir captures the enthusiasm as well as the memories of a visionary who loved nothing better than studying complex multidisciplinary concepts." - Publishers Weekly "'When I find myself in the company of scientists,' W. Mandelbrot (1924-2010) had the kind of beautiful, buzzing mind that made even gifted fellow scientists feel shabby around the edges. The Fractalist evokes the kinds of deceptively simple questions Mandelbrot asked--'What shape is a mountain, a coastline, a river or a dividing line between two river watersheds?'--and the profound answers he supplied." -Dwight Garner, The New York Times "Memoir of a brilliant mathematician who never thought of himself as a mathematician. charmingly written." - Kirkus "Benoit Mandelbrot was the one who let us appreciate chaos in all its glory--the noisy, the wayward, and the freakish, from the very small to the very large. He invented a new and slightly nebulous field of study--a kind of geometry, for want of a better description--and he invented that recondite name for it, fractal. "Clouds are not spheres --the most famous sentence he ever wrote-- mountains are not cones, coastlines are not circles, and bark is not smooth, nor does lightning travel in a straight line. "They are all fractal. Clouds, mountains, coastlines, bark, and lightning:...
