

Efficient stream analysis and its application to big data processing

By Rivetti di Val Cervo, Nicolo

Condition: New. Publisher/Verlag: Éditions universitaires européennes | In 1968, 140 IT companies were solicited to build the ARPANET network. Most of them regarded the project as outlandish and only 12 bid, while today there are 3.4 billions Internet users. The advent of Internet in the 90s, the commercial outbreak of cloud computing in the 2000s and the growing use of connected mobile devices since 2009 pushed the telecommunication and IT world into a new stage of interconnectivity. Researchers and practitioners understood that the massive amount of available data entailed new opportunities as well as challenges. In particular, common data management techniques were not tailored to match these features and, soon enough, the term Big Data emerged to capture all of these characteristics. The aim of this book is to design novel algorithms in the data streaming model, or extend current solutions, to solve practical issues in Big Data applications. | Format: Paperback | Language/Sprache: fr | 152 pp.

Reviews

This ebook is definitely not simple to begin on reading but really enjoyable to read through. This really is for all who state that there had not been a worth reading. You may like how the author publish this ebook.

-- Demetrius Buckridge

This book may be really worth a read through, and a lot better than other. It is really basic but excitement inside the 50 % in the pdf. I realized this pdf from my dad and i encouraged this publication to learn.

-- Curtis Bartell
