Commercial Space Industry Launches a New Phase (Paperback)

By Congressional Research Service

Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Rockets, satellites, and the services they provide, once the domain of governments, are increasingly launched and managed by privately owned companies. Although private aerospace firms have contracted with federal agencies since the onset of the Space Age six decades ago, U.S. government policy has sought to spur innovation and drive down costs by expanding the roles of satellite manufacturers and commercial launch providers. Global spending on space activity reached an estimated \$323 billion in 2015. Of this amount, nearly 40 was generated by commercial space products and services and 37 by commercial infrastructure and support industries. The U.S. government-including national security agencies and the National Aeronautics and Space Administration (NASA)-accounted for about 14 of global spending; government spending by other countries was responsible for the remaining 10 . The satellite and launch vehicle supply chains are global, with a small number of manufacturers. In 2015, global satellite manufacturing revenues were \$6 billion; launches booked \$2.6 billion in revenue. Ground stations-the largest part of the commercial space infrastructure-generated more than \$100 billion in revenue, largely from geolocation and navigation equipment....
