This item is printed on demand - Print on Demand Neuware - Research paper from the year 2012 in the subject Medicine - Epidemiology, grade: 4 on 4 scale (A), , language: English, abstract: Existing health behavior theories, such as the Transtheoretical model (TTM) and the Theory of Planned Behavior (TPB), serve as guides to public health intervention development and delivery by focusing on individuals' readiness to change, their perceptions of risks and benefits, and their behavioral intentions to change. This paper is presented in four Chapters. Chapter I provides a review of an article on a theory-based approach to understanding condom errors and problems reported by men attending a specific clinic. It also identifies the underlying theory, its major constructs and the raised research questions. Further, Chapter II discusses the use of health behavior models, in particular the core construct of the TTM, in relation to evaluating factors predicting condom use behaviors among adolescents across the Stages of Change. Furthermore, Chapter III suggests the use of TPB as a theoretical model to predict condom use in a particular population, to ultimately guide programs aiming at preventing risky sexual...
