Forgotten Books, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Reinforced Concrete Field Handbook Cement as it is received on the work, is well known as a fine, almost impalpable grayish powder. The one necessity, which on construction work becomes almost second nature, is to keep the cement dry in handling and storing. Portland Cement is an artificial mixture in certain well defined proportions established by practice, of lime, silica, alumina and other substances in minor quantities. Lime, mixed and calcined with clay, has the property of setting under water. A natural cement is made from rocky conglomerates which may contain the approximate quantities required, and which varies in its properties as the constituents of the natural deposits vary in proportion. Portland cement on the other hand is an exact artificial composition in proportions determined by analysis and experiment.
