PROCEEDINGS OF THE NINTH INTERNATIONAL CONFERENCE ON DEPENDABILITY AND COMPLEX SYSTEMS DEPCOS-RELCOMEX. JUNE 30 - JULY 4, 2014, BRUNÓW, POLAND

DOWNLOAD

Condition: New. Publisher/Verlag: Springer, Berlin | DepCoS - RELCOMEX is an annual series of conferences organized by Wrocław University of Technology to promote a comprehensive approach to evaluation of system performability which is now commonly called dependability . In contrast to classic analyses which were concentrated on reliability of technical resources and structures built from them, dependability is based on multi-disciplinary approach to theory, technology and maintenance of a system considered to be a multifaceted amalgamation of technical, information, organization, software and human (users, administrators, supervisors, etc.) resources. Diversity of processes being realized (data processing, system management, system monitoring, etc.), their concurrency and their reliance on in-system intelligence often severely impedes construction of strict mathematical models and calls for application of intelligent and soft computing methods. This book presents the proceedings of the Ninth International Conference on Dependability and Complex Systems DepCoS-RELCOMEX, which took place in Brunów Palace, Poland, from 30th June to 4th July, 2014. The articles selected for this volume illustrate the variety of topics that must be included in system dependability analysis: tools, methodologies and standards for modelling, design and simulation of the systems, security and confidentiality in information processing, specific issues of heterogeneous, today often wireless, computer networks or management of transportation networks. | Framework for the Distributed Computing of the Application Components.- Analysis of statistical characteristics of user arrival process to the testing service.- The Role of Enterprise Social Networking (ESN) on Business: Five Effective Recommendations for ESN.- Dependability and safety analysis of ETCS communication for ERTMS level 3 using performance statecharts and analytic estimation.- Entropy-based Internet Traffic Anomaly Detection: A Case Study.- A Formal Approach for Preventive Maintenance Workload Balancing.- Computer support for the railway safety management system - requirements analysis.- Computer support for the railway safety management system - first validation results.- Reductions of...
