FBC LTD, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Mining and Scientific Press, Vol. 93: From July to December, 1906 In the original survey it was shown that the slopes of the Mosquito range, back of Leadville, consist of fault blocks successively uplifted toward the east along north and south striking faults, in which the sedimentary beds lie in shallow synclines, the faults themselves following the steeper limb of the anticline. Recent underground developments have shown that, while the main fault planes were correctly located, their displacement was often distributed on several planes, so that the beds to the west of each fault zone descended not with the even slope of a syncline, but in a series of steps. Depths below the surface of the basins, as determined on the syncline the ory, were in general correctly given in the successive cross-sections of the original map. In the ease of the block represented by the Down-town area, however, no shafts had penetrated the covering of glacial deposits, and, while a shallow syncline in the underlying limestones was assumed to exist. In this block as in the others, no facts were...
