Nomad Press, United States, 2017. Hardback. Condition: New. Alexis Cornell (illustrator). Language: English . Brand New Book. Why do humans walk on two legs? Why do fish have gills? Life on Earth is incredibly diverse and part of the reason for this is evolution, or the theory that living things change with time. Evolution: How Life Adapts to a Changing Environment explores the theory of evolution, its history, how we think it works, examples of creatures who have evolved in response to specific circumstances, and what this might mean for the future of our planet. For billions of years, the amazing story of life on Earth has been unfolding. Millions of years ago, life on earth was nothing like it is today. Dinosaurs roamed the earth and pterosaurs flew through the skies. Millions of years before the dinosaurs, it was even more different. Strange ocean creatures lived in the seas, while the land was barren. Throughout its history, Earth has been home to an incredible diversity of living things that have changed dramatically over the many millennia. How have these living creatures changed so much? And how did that change happen? The answer: evolution! In **Evolution: How Life Adapts to a Changing Environment**, readers ages 9 to 12 will study evolution, or the process by which living things change over time. One of the most important ideas in biology, evolution explains why there are so many different living organisms on earth. It also explains why you are the way you are. Because of evolution, you walk on two legs and communicate with language. And although evolution is the story of our past, it also helps us understand our future and how we continue to evolve. Throughout **Evolution**, investigations and experiments provide hands-on, problem-solving opportunities for students, incorporating various challenges and...
