### **Reviews**

*This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Universities, Research and Brain Waste The research workers are makers of modern history as no other body of men are. The difference between the conditions under which our forefathers lived three hundred years ago and those under which we live to-day is due to the research workers. The layman little realizes what an influence individual men among these research workers exercise upon his daily life. In ordinary conversation the name of Shakespeare is heard more frequently than that of Newton and students of the great dramatist will be surprised to be told that Shakespeare as a factor in determining their lives is a bagatelle compared to Newton. The thought of the great scientist, as a matter of fact, permeates our civilization and can be traced distinctly in a multitude of conditions which surround our every-day life. To justify our statement, it suffices to refer briefly to Newton s discoveries of the calculus and the law of gravitation. The calculus is the basis of the greater part of higher mathematical analysis. It is the most powerful of all instruments in handling geometrical problems and it has opened up new territories in geometry which are all its own. What I want more particularly here to refer to, however, is the role which the calculus plays in connection with physical phenomena. Its aid is invoked in questions which relate to motion, light, heat, electricity. The principles of dynamics are formulated in terms of its notation. Unfortunately it has had a share in the development of modern artillery, for the theory of projectiles is an application of the calculus to the law of gravitation. It has had its place...
