Forgotten Books, 2018. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Handbook of the Amaryllideae Including the Alstroemerieae and Agaveae During the twenty-three years I have been at Kew I have made notes on the characters of all the Amaryllidew that have passed through my hands in a living state, and have had the opportunity of examining dried specimens of nearly all the species of the order. I have attempted in the present work to furnish cultivators and botanists with a compact working handbook, of which the main part consists of characters of the genera and species drawn up from actual specimens. I have not attempted to deal fully with the bibliography of the plants, or to trace out their pre-linnean history, or to say anything about their cultivation, or to deal, except very brie?y, with the garden hybrids, which are so numerous in this order. For fuller information on these points I would refer those who wish for it to Parkinson s paradisus, Kunth s Enumeratio, Bentham Hooker s genera Plant arum, Herbert s amaryllidaceae and his other writings, and the papers by Colonel Trevor Clarke in the gardeners Chronicle for 1878. I have referred in the body of the book to various other works, such as Burbidge s Narcissus and Jacobi s agaveae, that deal specially with particular tribes and genera. Two out of Bentham s five tribes of the order, Hypoxidece and Velloseece, have been dealt with recently elsewhere so fully that I have not thought it needful to include them here. The number of genera included is 61, and of species admitted about 670. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
