Taylor Francis Inc, United States, 2004. Paperback. Condition: New. New.. Language: English . Brand New Book ***** Print on Demand *****.Learn how a patient's behavior can factor into the prognosis of medically unexplainable illness! The Psychopathology of Functional Somatic Syndromes examines the link between mental illness and physical syndromes that lack organic disease explanations, including chronic fatigue syndrome, fibromyalgia, premenstrual dysphoria, irritable bowel, and Gulf War illness. The author has evaluated the best research work of the past 20 years to determine the association between psychopathology and functional illness, the biological gradient between somatic and psychological symptoms, and the manifestations of dysfunctional coping. The Psychopathology of Functional Somatic Syndromes challenges recent conceptualizations of functional somatic syndromes as brain disorders connected to affective spectrum disorder, serotonin deficiency, cerebral hypoperfusion or abnormal hypothalamic-pituitary-adrenal function and highlights the importance of abnormal illness behavior, sexual victimization, and maladaptive coping for the production and maintenance of these disorders. The Psychopathology of Functional Somatic Syndromes explores observations on the neurobiology and the personality abnormalities of patients made from structured data collected over a period of several years. It describes modern perceptions of functional somatic syndromes and how they have evolved into a tightly knit family of self-standing syndromes with a common core. The book examines the correlation between the burden of psychopathology and the physical features of these illnesses; reviews advances made in the appraisal of the neuroanatomy, neuropsychology, and neurochemistry of functional syndromes; and focuses on the connection between measurable dimensions of personality, coping, and illness behavior and the prognosis of medically unexplainable illnesses. The Psychopathology of Functional Somatic Syndromes examines: * psychiatric morbidity * brain perfusion * post-traumatic stress in Gulf War illness * the spectrum of mood disorders * the hypothalamic-pituitary-adrenal axis * the sexual victimization of patients * and much more!...
