Temple Lodge Publishing, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book. The most important task of the bees, apart from the preparation of honey, wax and propolis, is the healing of the atmosphere! The honey bee, *apis mellifera*, alone, is able to perform this task. This is its first and foremost purpose. - Ralf Roessner Describing the Genius of Bees as the group consciousness of the hive, Ralf Roessner presents an extraordinary commentary based on first-hand spiritual-scientific research and experience. He studies the mission of the Genius of Bees, the hexagonal structure of the crystalline heaven within which the bees operate, and the healing of the world through their work. Roessner elucidates the relationships between the Genius of Bees, the elemental world and the human being. He also speaks of his personal experiences with the organic earth hive , giving instructions on how they are made, and offers practical advice on tackling the varroa mite. In this unique and original work, the author, .attempts to describe the secrets of creation as far as he has experienced these himself . As he goes on to clarify: Many matters, which could only be vaguely perceived in former times, can now be investigated in a spiritual-scientific manner. A secret is only a secret to the extent it escapes the individual human being s powers of consciousness . Anyone seeking deeper insights into the world of the honey bee will be enriched by the content of this book.
