Brand New Book ***** Print on Demand *****.Excerpt from Water Resources of Hawaii This volume contains results of measurements of the flow of certain streams and ditches and rainfall records of the Territory of Hawaii made during the calendar year 1913. The investigations leading to the report were made by the United States Geological Survey in cooperation with the Territory of Hawaii, under the general sanction of the organic law of the Survey (Stat. L., vol. 20, p. 394), which contains the following paragraph: Provided, That this officer [the Director] shall have the direction of the geological survey and the classification of public lands and examination of the geological structure, mineral resources, and products of the national domain. As water is the most abundant and most valuable of the minerals, the investigation of water resources is authorized under the provision for examining mineral resources. The work has been supported since the fiscal year ending June 30, 1895, by appropriations in successive sundry civil bills passed by Congress under the following item: For gaging the streams and determining the water supply of the United States,...
