Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, after the way I believe.

(Prof. Loyce Runolfsson Jr.)

GROUPS 93 GALWAY/ST ANDREWS: VOLUME 2 (PAPERBACK)

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2004. Paperback. Condition: New. New.. Language: English . Brand New Book ***** Print on Demand *****.This two-volume book contains selected papers from the international conference Groups 1993 Galway/St Andrews which was held at University College, Galway in August 1993. The wealth and diversity of group theory is represented in these two volumes. Five main lecture courses were given at the conference. These were Geometry, Steinberg representations and complexity by J. L. Alperin (Chicago), Rickard equivalences and block theory by M. Broue (ENS, Paris), Cohomological finiteness conditions , by P. H. Kropholler (Queen Mary and Westfield College, London), Counting finite index subgroups , by A. Lubotzky (Hebrew University, Jerusalem), Lie methods in group theory by E. I. Zel manov (University of Wisconsin at Madison). Articles based on their lectures, in one case co-authored, form a substantial part of the Proceedings. Another main feature of the conference was a GAP workshop jointly run by J. Neubuser and M. Schonert (Rheinisch-Westfalische Technische Hochschule, Aachen). Two articles by Professor Neubuser, one co-authored, appear in the Proceedings. The other articles in the two volumes comprise both refereed survey and research articles contributed by other conference participants. As with the Proceedings of the earlier Groups-St Andrews conferences it is hoped that the articles in these Proceedings will, with their many references, prove valuable both to experienced researchers and also to new postgraduates interested in group theory.
