REAL TIME COMPUTING WITH THE PARAREAL ALGORITHM

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Solving time-dependent differential equations with increased speed | This work presents and evaluates a particularalgorithm used for the real time computations of time dependent ordinary andpartial differential equations which employs aparallelization strategy over the temporal domain. We also discuss the coupling ofthis method with another popular technique used for real timecomputations,model reduction, which will be shown to provide moregains than either method alone. In particular, we look atreduced order modeling based on...
