Viva Books Private Limited, 2015. Softcover. Condition: New. Description: You're about to discover 60 bold and unique mind-flexers that will grow branches on your brain cells to expand your creative, visual and analytical skills. These neuron-builders are built into intuitive puzzle-formats to wake up a variety of sleepy skills, but all have one thing in common: none of the solutions require knowing the correct definitions or spelling of words, as do crosswords, acrostics and wordfinds. Instead, these wonderfully graphic puzzles focus on number patterns, spatial relationships, logical thinking-mind-fertilizing problems that will require the use of your whole brain to solve. These diabolical diversions are challenging enough for experienced solvers, but the authors have taken pity on the rest of us and provided optional hints to help you get you started into each puzzle. They even provided solutions. You'll need them! Contents: The swinging koala ? Summer reflections ? Knight flight ? Times tables ? Muddle eastern boundaries ? Flower switch ? Small changes ?
