Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1858 Excerpt: .Moon s cent, alt., Subtract from Declination, The learner is recommended to practise working examples of this kind by Table XIX., because such practice will be of service in working the lunar observation by the first method in the Epitome; and, besides, the method furnishes a greater degree of exactness in all cases, and there is no danger of being too exact. CASE VI. Capt. Smith, of the ship Solon, in latitude 37 16 north, and longitude 24 38 east, on the 10th day of May, 1860, by sea account, wishes to find the time of the moon s passing his meridian, to get an observation for latitude. By the Nautical Almanac, he finds the time of its meridian passage at Greenwich to be on the 9th day, 16h. 16m., and the hourly difference in the next column is 2m.11. His longitude east is in time...
