Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Fruit Bud Formation: Progress of Investigations in 1908, 1909, 1910 The subject of fruit bud formation is so comprehensive that any investigation into the causes which bring about the formation of fruit buds, or into means by which these causes may be controlled or directed, leads one into a field so vast that it becomes immediately apparent that the subject must be studied phase by phase. Among the factors that underlie the formation of fruit buds are climatic conditions, varietal forms and adaptations, supply Of plant food, Supply Of moisture, age or maturity of the plant, and its health or vitality as affected by natural agencies such as attacks by insect pests, or fungous diseases, or by artificial practices such as pruning, training, thinning, and spraying. Investigations on fruit bud formation by the Department of Horticulture at the New Hampshire Agricultural Experiment Station have, therefore, been limited to such experiments as the material, means, and time of the department required. They are, however, designed to give results Of permanent value from a scientific standpoint as well as to furnish data Of practical value to the fruit growers of the state. In accordance with the plan Of limiting the field of investigation to the means at the disposal Of the department, it was decided to experiment only with the most important fruit grown in the state, the apple, and further to confine the work to the variety most largely grown, the Baldwin. The factors chosen as first in line for investigation include a comparative study of certain methods Of cultivation, fertilization and cover cropping. It was further planned to experiment on the effects Of both top and root pruning. The material,...
