Kassel University Press Nov 2011, 2011. Taschenbuch. Condition: Neu. Neuware - The aim of this study is to develop advanced wind power forecasting techniques to improve the accuracy of prediction systems using a variety of methods and to investigate the role of advanced wind power forecasting techniques in the grid and market integration of onshore and offshore wind farms. A Multi-Model approach using ensemble Numerical Weather Predictions ('NWP's') and Multi NWP approach are developed in order to optimize the wind power forecasting results. A new approach for a offshore-specific wind power prediction system based on NWP data and oceanographic parameters is presented. In conclusion, energy economical and technical benefits of wind power forecasting are analyzed. 146 pp. Englisch.
