

Automatic control theory [Paperback]

Filesize: 2.79 MB

Reviews

Great e book and helpful one. It really is written in straightforward terms and not hard to understand. You can expect to like how the blogger wrote this book.
(Hudson Christiansen)

AUTOMATIC CONTROL THEORY [PAPERBACK]

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback Pages Number: 226 Language: Simplified Chinese Publisher: Xi'an University of Electronic Science and Technology Press; 1 (1994 May 1. day). Principles of Automatic Control mainly include: the mathematical model of linear control systems - differential equations. transfer functions. dynamic structure. time domain analysis. root locus method. frequency domain analysis and system calibration and testing techniques; describing function of nonlinear control systems and phase plane method; sampling control system pulse transfer function. sampling control system analysis methods; Z-transform and Laplace transform. Principles of Automatic Control drawn. well-structured. narrative fluency. example-rich. the end of each chapter are accompanied by exercises. both suitable for all kinds of adult education-related professional materials can also be used as tertiary institutions. non-automatic control of a professional teaching books. self-study use. but also for readers. Contents: Chapter I Introduction Section I Introduction Section II open-loop control system and closed-loop control system in section III automatic control system. Section IV control system basic requirements of Section II of the exercises the first section differential equations Chapter II control system mathematical model of non- Figure Problem of Linear Differential Equations Section III transfer function of the fourth quarter dynamic structure time-domain analysis of section III. first-order system of performance indicators in section II of France first section typical input signal step response time domain analysis of the fourth quarter second order system time-domain analysis (5) high-end systems analysis of Section VI control system stability in section VII of the control system steady-state error analysis section VIII. to improve the first section of the root locus method. system performance measures exercise Section IV control system of the general rule in section II of the root locus root locus...
