CIVIL WAR MEMORIES (CLASSIC REPRINT) (PAPERBACK)

[DOWNLOAD](#)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Civil War Memories As a practitioner Dr. Stimson's contributions to the science and art of operative surgery were many and valuable. The best known are briefly: (1) The ligation of the ovarian and uterine arteries in sequence in their course in hysterectomy, 1889, a step which places the modern operation on a safe basis as admitted by Kelly and the other leading gynecologists; (2) the introduction and popularization of the molded plaster splint in the treatment of fractures; (3) his methods of reducing dislocations of the hip and of the shoulder; (4) combined traction (Stimson - Hodgen) for fractures of the femur; (5) in the treatment of old dislocations of the elbow, he was the first to call attention to the importance of the newly formed bone on the end of the humerus as an obstacle to the reduction of the dislocation; (6) Pfannenstiel - Stimson transverse incision. Independently he called attention to the use of the transverse incision as a means of approach to the abdominal contents, especially of the pelvis. Pfannenstiel's article was published in Germany before Dr. Stimson's in this country, and the operative approach is called by Pfannenstiel's name although Dr. Stimson had evidently used the method prior to the reported use of that method by Pfannenstiel. And finally it seems proper to record that, at the time of his death, he was gathering material from authoritative sources for the purpose of grouping various essays by surgeons at the war-front into a book on military surgery, treating especially such new conditions as shell-shock, Trench Dis ease, Antiseptic Irrigation of Wounds, Effect of Noxious Gases, Ambulance and Hospital Status, and the like....
