Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Ecological-Economic Modeling in the Cache River Basin: The Challenge of Ecological-Economic Modeling on a Watershed Basin, a Potential Framework for Sustainable Development; Final Report, Submitted to the Illinois Field Office of the Nature Conservancy The Cache River watershed encompasses a km<sup>2</sup> Area of 5 southern Illinois counties (alexander, Johnson, Massac, Pulaski, and Union). The watershed, located near the confluence of the Mississippi and Ohio Rivers is at the juncture of four physiographic provinces; Central Lowlands, Interior Low Plateau, Coastal Plain, and Ozark Plateau. Given the establishment of the Cache River bioserve in parts of these counties and the need to assess the ecological and economic effects of changing land use patterns in and around the bioserve, we developed a framework for integrating economic and ecological concerns in the formulation and evaluation of land use alternatives in a predominantly rural watershed. The challenges of economic development and natural community restoration in the Cache River bioserve include (1) identifying in a diversified, although sparse, regional economy, economic development opportunities in the watershed that will replace or enhance economic activity after establishment of the bioserve, and (2) proposing alternative land use scenarios outside the core area that are ecologically compatible with preservation of natural communities throughout the watershed. The framework incorporates an evaluation of a bioserve with a core area containing a critical ecological resource that must be protected and/or restored. For the Cache River bioserve, this resource is wetland and forest communities within a ha. Core area where The Nature Conservancy, u.s. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
