

The Distribution and Occurrence of the Baser Metals in Western Australia Volume 30

By Edward Sydney Simpson

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .leaders an inch or so in thickness, many of which carry good gold values, and from the breaking down of these most of the alluvial gold has evidently been derived. Some of these leaders are fairly persistent and run for considerable distances, whilst others are of very short length. All the main lines of reef exhibit a marked parallelism, striking as a rule five to ten degrees west of north and dipping to the west at an angle of about fifty degrees. Both the larger reefs and the leaders exhibit at times a marked lenticular habit, but this can hardly be said to be the general characteristic. The quartz in the larger reefs is usually white and glassy, being very hard and solid, and as a rule of low grade, though some fairly good crushings have been taken out of one or two of them. A...
